

HSBC // Aarooshi // Transcript

Hi my name is Aarooshi and I'm part of the Global Operations Graduate Programme. The programme offers a holistic experience and expedites the learning curve because it spans across various lines of business and global functions.

We get to have a birds-eye view of various processes and functions that sits within Global Operations. There are 4 rotations, each rotation is in a different line of business and makes us ready for any challenge, any opportunity at the end of the programme.

All of the managers I've had until now have been really supportive. They don't only act as managers, they act as a guide, a mentor and they try to shape your future in the best possible way they can.

It is always fun to participate in the sustainability part. I think our bank is also really focussing towards net zero carbon emissions. I have also been involved in a few of the initiatives. The latest one being the alternative use of plastics in your home.

My ambition within HSBC is to gain all the knowledge I can in the programme, to work for various lines of business and to learn as much as I can. It's an amazing place to work. A great place to grow, learn and develop yourself. We have ample amount of opportunities and the opportunities are open to everyone.
