

AWP Learner Journey

Introducing the Accelerating Wealth Programme.

Your gateway to fulfilling career in HSBC's dynamic and world class wealth business.

The programme will support you to apply your transferrable skills to the world of wealth, as well as develop new ones to become a successful HSBC Wealth professional.

You'll build your wealth expertise through learning pathways on our online learning platform Degreed, and by working with our virtual community of peers and experts.

Tutorials will help you prepare for your exams.

Phase One focuses on building your financial skills.

In Phase Two, you'll develop your client-facing skills with masterclasses, coaching or role play practice.

During Phase Three, you join your wealth business team and complete local onboarding.

You'll start applying all your skills in your new role, working with your buddy and line manager, sharing observations, receiving coaching, and reflecting on best practice in relationship management.

As you complete each phase, you'll be awarded an AWP digital badge, and at the end of Phase Three you'll graduate as a wealth professional.

During your transition into your new role, you'll continue to be supported by our community and have access to our Degreed Wealth Academy and your mentor.

This challenging and exciting programme could be the pathway to your new career.
