Centrally-funded net trading assets (period end)	104	128	130	164	187	23

Banking NII is a less volatile, more comprehensive view of the Group's rate-sensitive revenues

Background

- ◆ The Group deploys surplus liquidity from customer deposits and other banking book liabilities into both interest-earnings assets (IEAs) and net trading assets
- ◆ Using banking book liabilities to fund trading assets creates an accounting asymmetry:

- ◆ A similar asymmetry is created when banking book liabilities are deployed across currencies using FX swaps (income on the swap is recorded as trading income)
- ◆ Whether to deploy into IEAs or trading assets is a commercial decision relating to which assets will deliver the best returns
- ◆ **As a result, the IEA / trading asset mix can vary, causing revenue to shift from NII to Trading Income, and vice versa**

Definitions Banking book liabilities: liabilities measured at amortised cost, the costs of which are recognised in interest expense; Trading assets: includes financial instruments held for trading or managed on a fair value basis
Trading income: net income from financial instruments held for trading or managed on a fair value basis

Banking NII

Banking NII addresses these asymmetries by deducting, from reported NII, the internal cost of funding net trading assets and the cost of funding foreign exchange (FX) swaps in Markets Treasury

Banking NII, \$bn	1Q24
NII	8.7
Insurance NII	(0.1)
Central costs of funding trading income	2.7
Banking NII	11.3

Interest rate sensitivity

NII sensitivity understates the sensitivity of the Group's revenues to changes in interest rates, because it does not reflect the impact of interest rate changes on trading assets. Banking NII sensitivity is a more comprehensive metric:

Rate sensitivity at 31 Dec 2023, \$m*	(100)bps	+100bps
NII	(1,571)	1,053
Banking NII	(3,353)	2,832

A 3ppts shift from CASA to TMD would result in an incremental annual interest expense of c.\$(0.5)bn¹

Time deposits as a % of Hong Kong customer accounts has been revised due to the reclassification of some deposit portfolios, primarily in the Private Bank

* Around 60% of the interest expense relating to the central costs of funding trading income is booked in Asia

- ◆ Announced agreement to sell the business on 9 April 2024
- ◆ In 1Q24, recognised a pre-tax \$(1.1)bn impairment loss following the classification of the business to held-for-sale
- ◆ Expect to close the deal within the next 12 months
- ◆ At closing, cumulative foreign currency translation reserves and other reserves will recycle to the income statement. At 31 March 2024, foreign currency translation reserve losses stood at \$4.9bn and other reserve gains at \$0.1bn – these have already been recognised in capital and are expected to have no impact on CET1 or TNAV
- ◆ The transaction will be treated as a material notable item and excluded from the dividend payout calculation
- ◆ Transaction anticipated to have an insignificant impact on the Group's CET1 ratio by closing: the initial reduction of (0.1)ppts in 1Q24 is expected to be broadly offset by the estimated reduction in RWAs on closing
- ◆ At 31 March 2024: total assets \$5.1bn, RWAs \$9bn (of which operational risk RWAs \$1bn), equity \$1.6bn
- ◆ Between signing and closing, the loss on sale will vary by changes in the NAV of the disposed business and associated hyperinflation and foreign currency translation, and the fair value of consideration including price adjustments and migration costs

* Does not include the \$(1,137)m impairment on classification of Argentina to held-for-sale which is booked at a Group level

Total revenue down \$(1.8)bn / (21)% due to \$2.0bn notable items in 1Q23 (France impairment reversal)

Wealth up \$0.2bn (12%) with growth in all products. Key areas: (i) \$0.1bn non-NII growth in Private Banking (strong performance in Asia); (ii) Investment Distribution +\$0.1bn. Good performance in Asset Management and Life Insurance

Personal Banking down \$(0.1)bn due to the sale of our France retail operations and margin compression, partly offset by balance sheet growth across a number of entities

Balances 1Q24 vs. 1Q23

Customer lending down \$(14)bn, mainly \$(26)bn from the sale of France retail and the divestment of our business in Oman, partly offset by:

- ◆ Unsecured lending: HK +\$1bn (8%); UK +\$1bn (8%); Mexico +\$1bn (17%). Growth in other markets including Singapore and Taiwan

Customer accounts down \$(20)bn mainly: \$(22)bn from the sale of our France retail operations and \$(9)bn outflows in UK due to cost of living pressures and the competitive environment. This was partly offset by growth in Asia ex. HK +\$12bn (3%) notably in Singapore (16%), mainland China (24%), Australia (13%) and Taiwan (27%)

Invested assets +16%: NNIA of \$89bn; favourable market level, FX and other movements of \$79bn

* Costs up 12% reflecting IVB costs, performance related pay accruals and Argentina currency devaluation, offset by strategic cost saves

Revenue 1Q24 vs. 1Q23

- ◆ **Revenue** down \$(1.2)bn / (18)%, due to the non-repeat of the gain on acquisition of SVB UK in 1Q23 of \$1.6bn. This more than offset the growth of \$0.4bn due to HSBC Innovation Banking ('IVB') revenue, the higher rates environment and fee growth
- ◆ **GPS** up \$192m (7%) due to higher interest rates and fees supported by business growth initiatives and repricing actions, and IVB revenue
- ◆ **C&L** up \$30m (2%) reflecting IVB revenue, partly offset by lower margins and balances given lower market-wide demand in Hong Kong, repayment of Covid-19 government scheme lending in the UK and reduced commercial real estate exposures in mainland China and the US
- ◆ **GTRF** broadly stable due to improved margins, offset by the impacts of the softer trade cycle in Asia
- ◆ **Other products** includes the 1Q23 \$1.6bn gain on acquisition of SVB UK. This more than offset \$0.2bn of growth due to higher Markets Treasury revenue and interest on own capital, partly offset by the impacts of hyperinflationary accounting

Balance sheet

- ◆ **Customer lending** up \$3bn vs. 4Q23 driven by a \$4bn increase in key markets including Europe, South and Southeast Asia, China and Mexico, partly offset by transfers to HFS[‡] of \$1bn. Vs. 1Q23 down \$(14)bn / (4)% due to weaker market-wide loan demand in Hong Kong, repayment of Covid-19 government scheme lending in the UK and reduced Commercial Real Estate exposures in mainland China and the US
- ◆ **Customer accounts** down \$(14)bn / (3)% vs. 4Q23, mainly due to seasonality and transfers to HFS of \$2bn. Down \$(14)bn / (3)% vs. 1Q23 due to a market wide tightening of liquidity, notably in the UK and Asia, partly offset by the impact of deposit campaigns

Commentary 1Q24 vs. 1Q23

Revenue of \$4.5bn, up 1%

MSS revenue \$2.5bn, down \$(0.1)bn / (3)%:

- ◆ Global Debt Markets down as muted secondary client activity through the quarter offset strong primary activity in January
- ◆ A decline in Global FX compared to a very strong prior year as reduced volatility led to lower client volumes
- ◆ Equities up as client flows increased due to improved market sentiment
- ◆ Continued new client onboarding and strong demand in repos and prime finance drove strongly increased performance in Securities Financing

Banking revenue \$2.2bn, up \$0.1bn / 3%:

- ◆ GPS up from higher rates and continued repricing of services
- ◆ Investment Banking* down as 1Q23 benefitted from a small number of large transactions
- ◆ Weak client demand led to lower Credit & Lending revenue

Commentary 1Q24 vs. 4Q23

MSS revenue up 19%:

- ◆ Stronger primary issuance drove better client activity in Global Debt Markets
- ◆ Equities and Securities Financing also benefitted from stronger client activity due to improved sentiment

Banking revenue up 4%:

- ◆ Investment Banking up due to improved activity in Debt Capital Markets and Leveraged Finance

GBM Other benefitted from lower hyperinflationary adjustments and non-recurrence of 4Q23 Treasury disposal losses

1Q24 vs. 1Q23 commentary

Revenue up \$3.5bn, primarily reflecting:

- ◆ \$4.8bn gain in 1Q24 on the sale of our banking business in Canada, inclusive of fair value gains on the hedging of the sale proceeds; partly offset by:
- ◆ An impairment of \$(1.1)bn related to the planned disposal of our business in Argentina following the classification to HFS in 1Q24;
- ◆ Adverse fair value movements on financial instruments in Central Treasury and structural hedges;
- ◆ The non-recurrence of a 1Q23 favourable impact following the reversal of an impairment related to the sale of our France retail banking business, and an impairment related to the planned disposal of our operations in Armenia

RWAs down \$(5)bn, primarily reflecting impact of the disposal of our banking business in Canada, partly offset by the RWAs relating to the retained France retail portfolio which was transferred to Corporate Centre

Alternative Performance Measures

This Presentation contains non-IFRS measures used by management internally that constitute alternative performance measures under European Securities and Markets Authority guidance and non-GAAP financial measures defined in and presented in accordance with SEC rules and regulations (“Alternative Performance Measures”). The primary Alternative Performance Measures we use are presented on a “constant currency” basis which is computed by adjusting comparative period reported results for the effects of foreign currency translation differences, which distort period-on-period comparisons.

Reconciliations between Alternative Performance Measures and the most directly comparable measures under IFRS are provided in our 2023 Form 20-F and 1Q 2024 Earnings Release, when furnished with the SEC, each of which is available at www.hsbc.com.

Information in this Presentation was prepared as at 30 April 2024.
