This section gives important information for our shareholders, including contact information. It also includes an overview of key abbreviations and terminology used throughout the Annual Report and Accounts.

A glossary of terms used in the Annual Report and Accounts can be found in the Investors section of www.hsbc.com.

Fourth interim dividend for 2023

The Directors have approved a fourth interim dividend for 2023 of \$0.31 per ordinary share. Information on the currencies in which shareholders may elect to have the cash dividend paid can be viewed at www.hsbc.com/investors. The interim dividend will be paid in cash. The timetable for the interim dividend is:

Announcement	21 February 2024
Shares quoted ex-dividend in London, Hong Kong and Bermuda and American Depositary Shares ('ADS') quoted ex-dividend in New York	7 March 2024
Record date – London, Hong Kong, New York, Bermuda ¹	8 March 2024
Mailing of Annual Report and Accounts 2023 and/or Strategic Report 2023	22 March 2024
Final date for dividend election changes including Investor Centre electronic instructions and revocations of standing instructions for dividend elections	11 April 2024
Exchange rate determined for payment of dividends in pounds sterling and Hong Kong dollars	15 April 2024
Payment date	25 April 2024

1 Removals to and from the Overseas Branch register of shareholders in Hong Kong will not be permitted on this date.

Interim dividends for 2024

For the financial year 2023, the Group reverted to paying quarterly dividends, and achieved a dividend payout ratio of 50% of reported earnings per ordinary share ('EPS'), in line with our published target for 2023 and 2024. EPS for this purpose excludes material notable items and related impacts (including those associated with the sale of our retail banking operations in France, the agreed sale of our banking business in Canada and our acquisition of SVB UK). The Board has adopted a dividend policy designed to provide sustainable cash dividends, while retaining the flexibility to invest and grow the business in the future, supplemented by additional shareholder distributions, if appropriate.

Dividends are approved in US dollars and, at the election of the shareholder, paid in cash in one of, or in a combination of, US dollars, pounds sterling and Hong Kong dollars.

Other equity instruments

Additional tier 1 capital - contingent convertible securities

HSBC continues to issue contingent convertible securities that are included in its capital base as fully CRR II-compliant additional tier 1 capital securities. For further details on these securities, see Note 33 on the financial statements.

HSBC issued \$2,000m 8.000% perpetual contingent convertible securities on 7 March 2023.

2023 Annual General Meeting

With the exception of the shareholder requisitioned Resolutions 16, 17 and 18, which the Board recommended that shareholders vote against, all resolutions considered at the 2023 AGM held at 11:00am on 5 May 2023 at The Eastside Rooms, 2 Woodcock Street, Birmingham, B7 4BL, UK, were passed on a poll.

Earnings releases and interim results

First and third quarter results for 2024 will be released on 30 April 2024 and 29 October 2024, respectively. The interim results for the six months to 30 June 2024 will be issued on 31 July 2024.

Shareholder enquiries and communications

Enquiries

Any enquiries relating to shareholdings on the share register (for example, transfers of shares, changes of name or address, lost share certificates or dividend cheques) should be sent to the Registrars at the address given below. The Registrars offer an online facility, Investor Centre, which enables shareholders to manage their shareholding electronically.

Principal Register:	Computershare Investor Services PLC The Pavilions, Bridgwater Road, Bristol, BS99 6ZZ, United Kingdom	Telephone: +44 (0) 370 702 0137 www.investorcentre.co.uk/contactus Investor Centre: www.investorcentre.co.uk
Hong Kong Overseas Branch Register:	Computershare Hong Kong Investor Services Limited Rooms 1712–1716, 17th Floor Hopewell Centre, 183 Queen's Road East, Hong Kong	Telephone: +852 2862 8555 hsbc.ecom@computershare.com.hk Investor Centre: www.investorcentre.com/hk

If you have elected to receive general shareholder communications directly from HSBC Holdings, it is important to remember that your main contact for all matters relating to your investment remains the registered shareholder, or custodian or broker, who administers the investment on your behalf. Therefore, any changes or queries relating to your personal details and holding (including any administration of it) must continue to be directed to your existing contact at your investment manager or custodian or broker. HSBC Holdings cannot guarantee dealing with matters directed to it in error.

Shareholders who wish to receive a hard copy of the Annual Report and Accounts 2023 should contact HSBC's Registrars. Please visit www.hsbc.com/investors/investor-contacts for further information. You can also download an online version of the report from www.hsbc.com.

Electronic communications

Shareholders may at any time choose to receive corporate communications in printed form or to receive notifications of their availability on HSBC's website. To receive notifications of the availability of a corporate communication on HSBC's website by email, or revoke or amend an instruction to receive such notifications by email, go to www.hsbc.com/investors/shareholder-information/manage-your-shareholding. If you received a notification of the availability of this document on HSBC's website and would like to receive a printed copy, or if you would like to receive future corporate communications in printed form, please write or send an email (quoting your shareholder reference number) to the appropriate Registrars at the address given above. Printed copies will be provided without charge.

Chinese translation

A Chinese translation of the Annual Report and Accounts 2023 will be available upon request after 22 March 2024 from the Registrars (contact details above). Please also contact the Registrars if you wish to receive Chinese translations of future documents, or if you have received a Chinese translation of this document and do not wish to receive them in future.

《2023年報及賬目》備有中譯本,各界人士可於2024年3月22日之後,向上列股份登記處索閱。

閣下如欲於日後收取相關文件的中譯本,或已收到本文件的中譯本但不希望繼續收取有關譯本,均請聯絡股份登記處。

Where more information about HSBC is available

The Annual Report and Accounts 2023 and other information on HSBC may be downloaded from HSBC's website: www.hsbc.com.

Reports, statements and information that HSBC Holdings files with the Securities and Exchange Commission are available at www.sec.gov. Investors can also request hard copies of these documents upon payment of a duplicating fee by writing to the SEC at the Office of Investor Education and Advocacy, 100 F Street N.E., Washington, DC 20549-0213 or by emailing PublicInfo@sec.gov. Investors should call the Commission at (1) 202 551 8090 if they require further assistance. Investors may also obtain the reports and other information that HSBC Holdings files at www.nyse.com (telephone number (1) 212 656 3000).

HM Treasury has transposed the requirements set out under CRD IV and issued the Capital Requirements Country-by-Country Reporting Regulations 2013. The legislation requires HSBC Holdings to publish additional information in respect of the year ended 31 December 2023 by 31 December 2024. This information will be available on HSBC's website: www.hsbc.com/tax.

Taxation of shares and dividends

Taxation – UK residents

The following is a summary, under current law (unless otherwise noted) and the current published practice of HM Revenue and Customs ('HMRC'), of certain UK tax considerations that are likely to be material to the ownership and disposition of HSBC Holdings ordinary shares. The summary does not purport to be a comprehensive description of all the tax considerations that may be relevant to a holder of shares. In particular, the summary deals with shareholders who are resident solely in the UK for UK tax purposes and only with holders who hold the shares as investments and who are the beneficial owners of the shares, and does not address the tax treatment of certain classes of holders such as dealers in securities. Holders and prospective purchasers should consult their own advisers regarding the tax consequences of an investment in shares in light of their particular circumstances, including the effect of any national, state or local laws.

Taxation of dividends

Currently, no tax is withheld from dividends paid by HSBC Holdings.

UK resident individuals

UK resident individuals are generally entitled to a tax-free annual allowance in respect of dividends received. The amount of the allowance for the tax year beginning 6 April 2023 is £1,000. To the extent that dividend income received by an individual in the relevant tax year does not exceed the allowance, a nil tax rate will apply. Dividend income in excess of this allowance will be taxed at 8.75% for basic rate taxpayers, 33.75% for higher rate taxpayers and 39.35% for additional rate taxpayers.

UK resident companies

Shareholders that are within the charge to UK corporation tax should generally be entitled to an exemption from UK corporation tax on any dividends received from HSBC Holdings. However, the exemptions are not comprehensive and are subject to anti-avoidance rules.

If the conditions for exemption are not met or cease to be satisfied, or a shareholder within the charge to UK corporation tax elects for an otherwise exempt dividend to be taxable, the shareholder will be subject to UK corporation tax on dividends received from HSBC Holdings at the rate of corporation tax applicable to that shareholder.

Taxation of capital gains

The computation of the capital gains tax liability arising on disposals of shares in HSBC Holdings by shareholders subject to UK tax on capital gains can be complex, partly depending on whether, for example, the shares were purchased since April 1991, acquired in 1991 in exchange for shares in The Hongkong and Shanghai Banking Corporation Limited, or acquired subsequent to 1991 in exchange for shares in other companies.

For capital gains tax purposes, the acquisition cost for ordinary shares is adjusted to take account of subsequent rights and capitalisation issues. Any capital gain arising on a disposal of shares in HSBC Holdings by a UK company may also be adjusted to take account of indexation allowance if the shares were acquired before 1 January 2018, although the level of indexation allowance that is given in calculating the gain would be frozen at the value that would have been applied to a disposal of those shares in December 2017. If in doubt, shareholders are recommended to consult their professional advisers.

Stamp duty and stamp duty reserve tax

Transfers of shares by a written instrument of transfer generally will be subject to UK stamp duty at the rate of 0.5% of the consideration paid for the transfer (rounded up to the next £5), and such stamp duty is generally payable by the transferee. An agreement to transfer shares, or any interest therein, normally will give rise to a charge to stamp duty reserve tax at the rate of 0.5% of the consideration. However, provided an instrument of transfer of the shares is executed pursuant to the agreement and duly stamped before the date on which the stamp duty reserve tax becomes payable, under the current published practice of HMRC it will not be necessary to pay the stamp duty reserve tax, nor to apply for such tax to be cancelled. Stamp duty reserve tax is generally payable by the transferee.

Paperless transfers of shares within CREST, the UK's paperless share transfer system, are liable to stamp duty reserve tax at the rate of 0.5% of the consideration. In CREST transactions, the tax is calculated and payment made automatically. Deposits of shares into CREST generally will not be subject to stamp duty reserve tax, unless the transfer into CREST is itself for consideration. Until 31 December 2023, the charge to stamp duty reserve tax at 1.5% on the issue of shares (and transfers integral to capital raising) to a depositary receipt issuer or a clearance service was incompatible with European Union, and was not imposed by HMRC. If the UK Finance Bill 2023-24 is enacted in the form it stands as at the date hereof, that 1.5% charge will be repealed with retrospective effect from 1 January 2024.

Taxation – US residents

The following is a summary, under current law, of the principal UK tax and US federal income tax considerations that are likely to be material to the ownership and disposition of shares or American Depositary Shares ('ADSs') by a holder that is a US holder, as defined below, and who is not resident in the UK for UK tax purposes.

The summary does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a holder of shares or ADSs. In particular, the summary deals only with US holders that hold shares or ADSs as capital assets, and does not address the tax treatment of holders that are subject to special tax rules. These include banks, tax-exempt entities, insurance companies, dealers in securities or currencies, persons that hold shares or ADSs as part of an integrated investment (including a 'straddle' or 'hedge') comprised of a share or ADS and one or more other positions, and persons that own directly or indirectly 10% or more (by vote or value) of the stock of HSBC Holdings. This discussion is based on laws, treaties, judicial decisions and regulatory interpretations in effect on the date hereof, all of which are subject to change.

For the purposes of this discussion, a 'US holder' is a beneficial holder that is a citizen or resident of the United States, a US domestic corporation or otherwise is subject to US federal income taxes on a net income basis in respect thereof.

Holders and prospective purchasers should consult their own advisers regarding the tax consequences of an investment in shares or ADSs in light of their particular circumstances, including the effect of any national, state or local laws.

Any US federal tax advice included in the *Annual Report and Accounts 2023* is for informational purposes only. It was not intended or written to be used, and cannot be used, for the purpose of avoiding US federal tax penalties.

Taxation of dividends

Currently, no tax is withheld from dividends paid by HSBC Holdings. For US tax purposes, a US holder must include cash dividends paid on the shares or ADSs in ordinary income on the date that such holder or the ADS depositary receives them, translating dividends paid in UK pounds sterling into US dollars using the exchange rate in effect on the date of receipt. A US holder that elects to receive shares in lieu of a cash dividend must include in ordinary income the fair market value of such shares on the dividend payment date, and the tax basis of those shares will equal such fair market value.

Subject to certain exceptions for positions that are held for less than 61 days, and subject to a foreign corporation being considered a 'qualified foreign corporation' (which includes not being classified for US federal income tax purposes as a passive foreign investment company), certain dividends ('qualified dividends') received by an individual US holder generally will be subject to US taxation at preferential rates.

Based on the company's audited financial statements and relevant market and shareholder data, HSBC Holdings does not believe that it was a passive investment company for its 2023 taxable year and does not anticipate becoming a passive foreign investment company in 2024 or the foreseeable future. Accordingly, dividends paid on the shares or ADSs generally should be eligible for qualified dividends treatment.

Taxation of capital gains

Gains realised by a US holder on the sale or other disposition of shares or ADSs normally will not be subject to UK taxation unless at the time of the sale or other disposition the holder carries on a trade, profession or vocation in the UK through a branch or agency or permanent establishment and the shares or ADSs are or have been used, held or acquired for the purposes of such trade, profession, vocation, branch or agency or permanent establishment. Such gains will be included in income for US tax purposes, and will be long-term capital gains if the shares or ADSs were held for more than one year. A long-term capital gain realised by an individual US holder generally will be subject to US tax at preferential rates.

Inheritance tax

Shares or ADSs held by an individual whose domicile is determined to be the US for the purposes of the United States-United Kingdom Double Taxation Convention relating to estate and gift taxes (the 'Estate Tax Treaty') and who is not for such purposes a national of the UK will not, provided any US federal estate or gift tax chargeable has been paid, be subject to UK inheritance tax on the individual's death or on a lifetime transfer of shares or ADSs except in certain cases where the shares or ADSs (i) are comprised in a settlement (unless, at the time of the settlement, the settlor was domiciled in the US and was not a national of the UK), (ii) are part of the business property of a UK permanent establishment of an enterprise, or (iii) pertain to a UK fixed base of an individual used for the performance of independent personal services. In such cases, the Estate Tax Treaty generally provides a credit against US federal tax liability for the amount of any tax paid in the UK in a case where the shares or ADSs are subject to both UK inheritance tax and to US federal estate or gift tax.

Stamp duty and stamp duty reserve tax - ADSs

If shares are transferred to a clearance service or American Depositary Receipt ('ADR') issuer (which will include a transfer of shares to the depositary) UK stamp duty and/or stamp duty reserve tax will be payable unless the UK Finance Bill 2023-24 is enacted in the form it stands as at the date hereof and the transfer is, or is treated as being, in the course of a capital raising arrangement. The stamp duty or stamp duty reserve tax is generally payable on the consideration for the transfer and is payable at the aggregate rate of 1.5%.

The amount of stamp duty reserve tax payable on such a transfer will be reduced by any stamp duty paid in connection with the same transfer.

No stamp duty will be payable on the transfer of, or agreement to transfer, an ADS, provided that the ADR and any separate instrument of transfer or written agreement to transfer remain at all times outside the UK, and provided further that any such transfer or written agreement to transfer is not executed in the UK. No stamp duty reserve tax will be payable on a transfer of, or agreement to transfer, an ADS effected by the transfer of an ADR.

US information reporting and backup withholding tax

Distributions made on shares or ADSs and proceeds from the sale of shares or ADSs that are paid within the US, or through certain financial intermediaries to US holders, are subject to US information reporting and may be subject to a US 'backup' withholding tax. General exceptions to this rule happen when the US holder: establishes that it is a corporation (other than an S corporation) or other exempt holder; or provides a correct taxpayer identification number, certifies that no loss of exemption from backup withholding has occurred and otherwise complies with the applicable requirements of the backup withholding rules. Holders that are not US persons (as defined in the US Internal Revenue Code of 1986, as amended) generally are not subject to US information reporting or backup withholding tax, but may be required to comply with applicable certification procedures to establish that they are not US persons in order to avoid the application of such US information reporting requirements or backup withholding tax to payments received within the US or through certain financial intermediaries.

Approach to ESG reporting

The information set out in the ESG review on pages 41 to 98, taken together with other information relating to ESG issues included in this Annual Report and Accounts 2023, aims to provide key ESG information and data relevant to our operations for the year ended 31 December 2023. The data is compiled for the financial year 1 January to 31 December 2023 unless otherwise specified. Measurement techniques and calculations are explained next to data tables where necessary. There are no significant changes from the previous reporting period in terms of scope, boundary or measurement of our reporting of ESG matters. Where relevant, rationale is provided for any restatement of information or data that has been previously published. We have also considered our obligations under the Environmental, Social and Governance Reporting Guide contained in Appendix C2 to The Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited ('ESG Guide') and under LR9.8.6R(8) of the Financial Conduct Authority's ('FCA') Listing Rules. We will continue to develop and refine our reporting and disclosures on ESG matters in line with feedback received from our investors and other stakeholders, and in view of our obligations under the ESG Guide and the FCA's Listing Rules

ESG Guide

We comply with the 'comply or explain' provisions in the ESG Guide, save for certain items, which we describe in more detail below:

- A1(b) on relevant laws/regulations relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste, and on emissions: taking into account the nature of our business, we do not believe that there are relevant laws and regulations in these areas that have significant impacts on our operations. Nevertheless, we are fully compliant with our publication of information regarding scope 1 and 2 carbon emissions, while we only partially publish information on scope 3 carbon emissions, as the data required for that publication is not yet fully available.
- A1.3 on total hazardous waste produced, A1.4 on total nonhazardous waste produced: Taking into account the nature of our business, we do not consider hazardous waste to be a material issue for our stakeholders. As such, we report only on total waste produced, which includes hazardous and non-hazardous waste.
- A1.6 on handling hazardous and non-hazardous waste: Taking into account the nature of our business, we do not consider this to be a material issue for our stakeholders. Notwithstanding this, we continue to focus on the reduction and recycling of all waste. Building on the success of our previous operational environmental strategy, we are continuing to seek to identify key opportunities where we can lessen our wider environmental impact, including waste management. For further details, please see our ESG review on page 63.
- A2.4 on sourcing water issue and water efficiency target: Taking into account the nature of our business, we do not consider this to be a material issue for our stakeholders. Notwithstanding this, we have implemented measures to further reduce water consumption through the installation of flow restrictors, auto-taps and low or zero flush sanitary fittings and continue to track our water consumption.
- A2.5 on packaging material, B6(b) on issues related to health and safety and labelling relating to products and services provided, B6.1 on percentage of total products sold or shipped subject to recalls for safety and health reasons and B6.4 in recall procedures: Taking into account the nature of our business, we do not consider these to be material issues for our stakeholders.

This is aligned with the materiality reporting principle that is set out in the ESG Guide. See 'How we decide what to measure' on page 43 $\,$

for further information on how we determine what matters are material to our stakeholders.

TCFD recommendations and recommended disclosures

As noted on page 17, we have considered our 'comply or explain' obligation under both the UK's Financial Conduct Authority's Listing Rules and Sections 414 CA and 414CB of the UK Companies Act 2006, and confirm that we have made disclosures consistent with the TCFD Recommendations and Recommended Disclosures, including its annexes and supplemental guidance, save for certain items, which we summarise below:

Targets setting

Metrics and targets (c) relating to short-term targets: For financed emissions we do not plan to set 2025 targets. We set targets in line with the Net-Zero Banking Alliance ('NZBA') guidelines by setting 2030 targets. While the NZBA define 2030 as intermediate, we use different time horizons for climate risk management. We define short term as time periods up to 2025; medium term is between 2026 and 2035; and long term is between 2036 and 2050. In 2023, we disclose interim 2030 financed emissions targets for seven sectors comprising five on-balance sheet and two combined financed emissions targets, as we outline on page 18. For the shipping sector, we have taken a decision not to set a standalone financed emissions target. The decision follows a reduction in our exposure to the sector after the strategic sale of part of our European shipping portfolio. This aligns with NZBA guidelines on sector inclusion for target setting. We have now set combined on-balance sheet financed emissions and facilitated emissions targets for two emissions-intensive sectors: oil and gas, and power and utilities, and report the combined progress for both sectors. We intend to review the financed emissions baselines and targets annually and restate where relevant, to help ensure that they are aligned with market practice and current climate science. For further details on the restatements and targets and progress of financed emissions, see section 'Our approach to financed emissions recalculations' and 'Targets and Progress' on page 56 and 57.

Metrics and targets (c) relating to capital deployment target: We do not currently disclose a target for capital deployment. In relation to capital deployment, since 2015, we have issued more than \$2bn of our own green bonds and structured green bonds with the capital invested into a variety of green projects, including: green buildings, renewable energy and clean transportation projects. In 2023, we further progressed our internal review and enhancement of the green bond framework, with further refinement including internal and external review to be undertaken in 2024. This will be subject to continuous review and monitoring to ensure that they remain up to date and reflect updated standards, taxonomies and best practices. Any such developments in standards, taxonomies and best practices over time could result in revisions in our reporting going forward and lead to differences year-on-year as compared to prior years. See the *HSBC Green Bond Report* for further information.

Metrics and targets (c) relating to internal carbon pricing target: We do not currently disclose internal carbon pricing target due to transitional challenges such as developing the appropriate systems and processes, but we considered carbon prices as an input for our climate scenario analysis exercise. We expect to further enhance the disclosure in the medium term as more data becomes available.

Impacts on financial planning and performance

Strategy (b) relating to financial planning and performance: We have used climate scenarios to inform our organisation's business, strategy and financial planning. In 2023, we continued to incorporate certain aspects of sustainable finance and financed emissions within our financial planning process. We do not fully disclose impacts from climate-related opportunities on financial planning and performance including on revenue, costs and the balance sheet, quantitative scenario analysis, detailed climate risk exposures for all sectors and geographies or physical risk metrics. This is due to transitional challenges in relation to data limitations, although nascent work is ongoing in these areas. We expect these data limitations to be addressed in the medium term as more reliable data becomes available and technology solutions are implemented.

Strategy (b) related to transition plan: We published our Group-wide net zero transition plan in January 2024. In this plan, we provided an overview of our approach to net zero and the actions we are taking to help meet our ambitions. We want to be clear about our approach, the change underway today and what we plan to do in the future. We also want to be transparent about where there are still unresolved issues and uncertainties. We are still developing our disclosures, including considerations of possible additional data in relation to our financial plans, budgets, and related financial approach for the implementation of the transition plan in the medium term (e.g. amount of capital and other expenditures supporting our decarbonisation strategy).

Metrics and targets (a) relating to internal carbon prices and climaterelated opportunities metrics: We do not currently disclose internal carbon prices due to transitional challenges such as data challenges. But we considered carbon prices as an input for our climate scenario analysis exercise. In addition, we do not currently fully disclose the proportion of revenue or proportion of assets, capital deployment or other business activities aligned with climate-related opportunities, including revenue from products and services designed for a lowcarbon economy, forward-looking metrics consistent with our business or strategic planning time horizons. In relation to sustainable finance revenue and assets we are disclosing certain elements. We expect the data and system limitations related to financial planning and performance, and climate-related opportunities metrics to be addressed in the medium term as more reliable data becomes available and technology solutions are implemented. We expect to further enhance this disclosure in the medium term.

Impacts of transition and physical risk

Strategy (c) relating to quantitative scenario analysis: We do not currently fully disclose the impacts of transition and physical risk quantitatively, due to transitional challenges including data limitations and evolving science and methodologies. In 2023, we have disclosed the impairment impacts for our wholesale, retail and commercial real estate portfolios in different climate scenarios. In addition, we have disclosed losses on our retail mortgage book under three scenarios and flood depths for specific markets. For our wholesale book, we have disclosed potential implications on our expected credit losses for 11 sectors under two scenarios. We have also disclosed a heat map showing how we expect the risks to evolve over time.

Metrics and targets (a) relating to detailed climate-related risk exposure metrics for physical and transition risks: We do not fully disclose metrics used to assess the impact of climate-related physical (chronic) and transitions (policy and legal, technology and market) risks on retail lending, parts of wholesale lending and other financial intermediary business activities (specifically credit exposure, equity and debt holdings, or trading positions, each broken down by industry, geography, credit quality and average tenor). We are aiming to develop the appropriate systems, data and processes to provide these disclosures in future years. We disclose the exposure to six high transition risk wholesale sectors and the flood risk exposure and Energy Performance Certificate breakdown for the UK portfolio.

Metrics and targets (c) on targets related to physical risk: We do not currently disclose targets used to measure and manage physical risk. This is due to transitional challenges including data limitations of physical risk metrics. For retail, we do not use targets to measure and manage physical risk. In 2023 we introduced internally a global 'soft trigger' monitoring and review process for physical risk exposure where a market reaches or exceeds a set threshold, as this ensures markets are actively considering their balance sheet risk exposure to peril events. We also consider physical and transition risk as an input for our climate scenario analysis exercise.

We expect to further enhance our disclosures as our data, quantitative scenario analysis, risk metrics and physical risk targets evolve, and technology solutions are implemented in the medium term.

Scope 3 emissions disclosure

Metrics and targets (b) relating to scope 3 emissions metrics: We currently disclose partial scope 3 greenhouse gas emissions including business travel, supply chain and financed emissions. We currently disclose four out of 15 categories of scope 3 greenhouse gas emissions including business travel, supply chain and financed emissions. In relation to financed emissions, we publish on-balance sheet financed emissions for a number of sectors as detailed on page 18. We also publish facilitated emissions for the oil and gas, and power and utilities sectors. Future disclosures on financed emissions and related risks are reliant on our customers publicly disclosing their greenhouse gas emissions, targets and plans, and related risks. We disclosures but balance this with the recognition that existing data and reporting processes require significant enhancements.

Other matters

Strategy (b) relating to access to capital: We have considered the impact of climate-related issues on our businesses, strategy and financial planning. Our access to capital may be impacted by reputational concerns as a result of climate action or inaction. In addition, if we are perceived to mislead stakeholders on our business activities or if we fail to achieve our stated net zero ambitions, we could face reputational damage, impacting our revenue-generating ability and potentially our access to capital markets. We expect to further enhance the disclosure in the medium term as more data becomes available.

To manage these risks we have integrated climate risk into our existing risk taxonomy, and incorporated it within the risk management framework through the policies and controls for the existing risks where appropriate.

Metrics and targets (c) relating to water usage target: We have described the targets used by the organisation to manage climaterelated risks and opportunities and performance against targets. However, taking into account the nature of our business, we do not consider water usage to be a material target for our business and, therefore, we have not included a target in this year's disclosure.

With respect to our obligations under LR9.8.6R(8) of the FCA's Listing Rules, as part of considering what to measure and publicly report, we perform an assessment to ascertain the appropriate level of detail to be included in the climate-related financial disclosures that are set out in our *Annual Report and Accounts*. Our assessment takes into account factors such as the level of our exposure to climate-related risks and opportunities, the scope and objectives of our climate-related strategy, transitional challenges, and the nature, size and complexity of our business. See 'How we decide what to measure' on page 43 for further information.

Cautionary statement regarding forward-looking statements

This Annual Report and Accounts 2023 contains certain forwardlooking statements with respect to HSBC's financial condition; results of operations and business, including the strategic priorities; financial, investment and capital targets; and ESG targets, commitments and ambitions described herein.

Statements that are not historical facts, including statements about HSBC's beliefs and expectations, are forward-looking statements. Words such as 'may', 'will', 'should', 'expects', 'targets', 'anticipates', 'intends', 'plans', 'believes', 'seeks', 'estimates', 'potential' and 'reasonably possible', or the negative thereof, other variations thereon or similar expressions are intended to identify forward-looking statements. These statements are based on current plans. information, data, estimates and projections, and therefore undue reliance should not be placed on them. Forward-looking statements speak only as of the date they are made. HSBC makes no commitment to revise or update any forward-looking statements to reflect events or circumstances occurring or existing after the date of any forward-looking statements. Written and/or oral forward-looking statements may also be made in the periodic reports to the US Securities and Exchange Commission, summary financial statements to shareholders, proxy statements, offering circulars and

prospectuses, press releases and other written materials, and in oral statements made by HSBC's directors, officers or employees to third parties, including financial analysts. Forward-looking statements involve inherent risks and uncertainties. Readers are cautioned that a number of factors could cause actual results to differ, in some instances materially, from those anticipated or implied in any forward-looking statement. These include, but are not limited to:

- changes in general economic conditions in the markets in which we operate, such as new, continuing or deepening recessions, prolonged inflationary pressures and fluctuations in employment levels and the creditworthiness of customers beyond those factored into consensus forecasts; the Russia-Ukraine war and the Israel-Hamas war and their impact on global economies and the markets where HSBC operates, which could have a material adverse effect on (among other things) our financial condition, results of operations, prospects, liquidity, capital position and credit ratings; deviations from the market and economic assumptions that form the basis for our ECL measurements (including, without limitation, as a result of the Russia-Ukraine war and the Israel-Hamas war, inflationary pressures, commodity price changes, and ongoing developments in the commercial real estate sector in mainland China); potential changes in HSBC's dividend policy; changes and volatility in foreign exchange rates and interest rates levels, including the accounting impact resulting from financial reporting in respect of hyperinflationary economies; volatility in equity markets; lack of liquidity in wholesale funding or capital markets, which may affect our ability to meet our obligations under financing facilities or to fund new loans, investments and businesses; geopolitical tensions or diplomatic developments producing social instability or legal uncertainty, such as the Russia-Ukraine war or the Israel-Hamas war (including the continuation and escalation thereof) and the related imposition of sanctions and trade restrictions, supply chain restrictions and disruptions, sustained increases in energy prices and key commodity prices, claims of human rights violations, diplomatic tensions, including between China and the US, the UK, the EU, India and other countries, and developments in Hong Kong and Taiwan, alongside other potential areas of tension, which may adversely affect HSBC by creating regulatory, reputational and market risks; the efficacy of government, customer, and HSBC's actions in managing and mitigating ESG risks, in particular climate risk, nature-related risks and human rights risks, and in supporting the global transition to net zero carbon emissions, each of which can impact HSBC both directly and indirectly through our customers and which may result in potential financial and nonfinancial impacts; illiquidity and downward price pressure in national real estate markets; adverse changes in central banks' policies with respect to the provision of liquidity support to financial markets; heightened market concerns over sovereign creditworthiness in over-indebted countries; adverse changes in the funding status of public or private defined benefit pensions; societal shifts in customer financing and investment needs, including consumer perception as to the continuing availability of credit; exposure to counterparty risk, including third parties using us as a conduit for illegal activities without our knowledge; the discontinuation of certain key lbors and the transition of the remaining legacy lbor contracts to near risk-free benchmark rates. which continues to expose HSBC to some financial and nonfinancial risks; and price competition in the market segments we serve:
- changes in government policy and regulation, including the monetary, interest rate and other policies of central banks and other regulatory authorities in the principal markets in which we operate and the consequences thereof (including, without limitation, actions taken as a result of the impact of the Russia-Ukraine war on inflation); initiatives to change the size, scope of activities and interconnectedness of financial institutions in connection with the implementation of stricter regulation of financial institutions in key markets worldwide; revised capital and liquidity benchmarks, which could serve to deleverage bank balance sheets and lower returns available from the current business model and portfolio mix; changes to tax laws and tax rates applicable to HSBC, including the imposition of levies or taxes designed to change business mix and risk appetite; the

practices, pricing or responsibilities of financial institutions serving their consumer markets; expropriation, nationalisation, confiscation of assets and changes in legislation relating to foreign ownership: the UK's relationship with the EU, which continues to be characterised by uncertainty and political disagreement, despite the signing of the Trade and Cooperation Agreement between the UK and the EU, particularly with respect to the potential divergence of UK and EU law on the regulation of financial services; changes in government approach and regulatory treatment in relation to ESG disclosures and reporting requirements, and the current lack of a single standardised regulatory approach to ESG across all sectors and markets; changes in UK macroeconomic and fiscal policy, which may result in fluctuations in the value of the pound sterling; general changes in government policy that may significantly influence investor decisions; the costs, effects and outcomes of regulatory reviews, actions or litigation, including any additional compliance requirements; and the effects of competition in the markets where we operate including increased competition from non-bank financial services companies; and

factors specific to HSBC, including our success in adequately identifying the risks we face, such as the incidence of loan losses or delinquency, and managing those risks (through account management, hedging and other techniques); our ability to achieve our financial, investment, capital and ESG targets, commitments and ambitions (including the positions set forth in our thermal coal phase-out policy and our energy policy and our targets to reduce our on-balance sheet financed emissions and, where applicable, facilitated emissions in our portfolio of selected high-emitting sectors), which may result in our failure to achieve any of the expected benefits of our strategic priorities; evolving regulatory requirements and the development of new technologies, including artificial intelligence, affecting how we manage model risk; model limitations or failure, including, without limitation, the impact that high inflationary pressures and rising interest rates have had on the performance and usage of financial models, which may require us to hold additional capital, incur losses and/or use compensating controls, such as judgemental post-model adjustments, to address model limitations; changes to the judgements, estimates and assumptions we base our financial statements on; changes in our ability to meet the requirements of regulatory stress tests; a reduction in the credit ratings assigned to us or any of our subsidiaries, which could increase the cost or decrease the availability of our funding and affect our liquidity position and net interest margin; changes to the reliability and security of our data management, data privacy, information and technology infrastructure, including threats from cyber-attacks, which may impact our ability to service clients and may result in financial loss, business disruption and/or loss of customer services and data; the accuracy and effective use of data, including internal management information that may not have been independently verified; changes in insurance customer behaviour and insurance claim rates; our dependence on loan payments and dividends from subsidiaries to meet our obligations; changes in our reporting frameworks and accounting standards, which have had and may continue to have a material impact on the way we prepare our financial statements; our ability to successfully execute planned strategic acquisitions and disposals; our success in adequately integrating acquired businesses into our business, including the integration of SVB UK into our CMB business; changes in our ability to manage third-party, fraud, financial crime and reputational risks inherent in our operations; employee misconduct, which may result in regulatory sanctions and/or reputational or financial harm; changes in skill requirements, ways of working and talent shortages, which may affect our ability to recruit and retain senior management and diverse and skilled personnel; and changes in our ability to develop sustainable finance and ESG-related products consistent with the evolving expectations of our regulators, and our capacity to measure the environmental and social impacts from our financing activity (including as a result of data limitations and changes in methodologies), which may affect our ability to achieve our ESG ambitions, targets and commitments, including our net zero ambition, our targets to reduce on-balance sheet financed emissions and, where applicable, facilitated emissions in

our portfolio of selected high-emitting sectors and the positions set forth in our thermal coal phase-out policy and our energy policy, and increase the risk of greenwashing. Effective risk management depends on, among other things, our ability through stress testing and other techniques to prepare for events that cannot be captured by the statistical models it uses; our success in addressing operational, legal and regulatory, and litigation challenges; and other risks and uncertainties we identify in 'Top and emerging risks' on pages 140 to 144.

This Annual Report and Accounts 2023 contains a number of images, graphics, infographics, text boxes and illustrative case studies and credentials which aim to give a high-level overview of certain elements of our disclosures and to improve accessibility for readers. These images, graphics, infographics, text boxes and illustrative case studies and credentials are designed to be read within the context of the Annual Report and Accounts 2023 as a whole.

Additional cautionary statement regarding ESG data, metrics and forward-looking statements

The Annual Report and Accounts 2023 contains a number of forwardlooking statements (as defined above) with respect to HSBC's ESG targets, commitments, ambitions, climate-related pathways, processes and plans, and the methodologies and scenarios we use, or intend to use, to assess our progress in relation to these ('ESGrelated forward-looking statements').

In preparing the ESG-related information contained in the Annual Report and Accounts 2023, HSBC has made a number of key judgements, estimations and assumptions, and the processes and issues involved are complex. We have used ESG (including climate) data, models and methodologies that we consider, as of the date on which they were used, to be appropriate and suitable to understand and assess climate change risk and its impact, to analyse financed emissions - and operational and supply chain emissions, to set ESGrelated targets and to evaluate the classification of sustainable finance and investments. However, these data, models and methodologies are often new, are rapidly evolving and are not of the same standard as those available in the context of other financial information, nor are they subject to the same or equivalent disclosure standards, historical reference points, benchmarks or globally accepted accounting principles. In particular, it is not possible to rely on historical data as a strong indicator of future trajectories in the case of climate change and its evolution. Outputs of models, processed data and methodologies are also likely to be affected by underlying data quality, which can be hard to assess and we expect industry guidance, market practice, and regulations in this field to continue to change. We also face challenges in relation to our ability to access data on a timely basis, lack of consistency and comparability between data that is available and our ability to collect and process relevant data. Consequently, the ESG-related forward-looking statements and ESG metrics disclosed in the Annual Report and Accounts 2023 carry an additional degree of inherent risk and uncertainty.

Due to the unpredictable evolution of climate change and its future impact and the uncertainty of future policy and market response to ESG-related issues and the effectiveness of any such response, HSBC may have to re-evaluate its progress towards its ESG ambitions, commitments and targets in the future, update the methodologies it uses or alter its approach to ESG (including climate) analysis and may be required to amend, update and recalculate its ESG disclosures and assessments in the future, as market practice and data quality and availability develop.

No assurance can be given by or on behalf of HSBC as to the likelihood of the achievement or reasonableness of any projections, estimates, forecasts, targets, commitments, ambitions, prospects or returns contained herein. Readers are cautioned that a number of factors, both external and those specific to HSBC, could cause actual achievements, results, performance or other future events or conditions to differ, in some cases materially, from those stated, implied and/or reflected in any ESG-related forward-looking statement or metric due to a variety of risks, uncertainties and other factors (including without limitation those referred to below):

- Climate change projection risk: this includes, for example, the evolution of climate change and its impacts, changes in the scientific assessment of climate change impacts, transition pathways and future risk exposure and limitations of climate scenario forecasts;
- ESG projection risk: ESG metrics are complex and are still subject to development. In addition, the scenarios employed in relation to them, and the models that analyse them have limitations that are sensitive to key assumptions and parameters, which are themselves subject to some uncertainty, and cannot fully capture all of the potential effects of climate, policy and technology-driven outcomes;
- Changes in the ESG regulatory landscape: this involves changes in government approach and regulatory treatment in relation to ESG disclosures and reporting requirements, and the current lack of a single standardised regulatory approach to ESG across all sectors and markets;
- Variation in reporting standards: ESG reporting standards are still developing and are not standardised or comparable across all sectors and markets, new reporting standards in relation to different ESG metrics are still emerging;
- Data availability, accuracy, verifiability and data gaps: our disclosures are limited by the availability of high quality data in some areas and our own ability to timely collect and process such data as required. Where data is not available for all sectors or consistently year on year, there may be an impact to our data quality scores. While we expect our data quality scores to improve over time, as companies continue to expand their disclosures to meet growing regulatory and stakeholder expectations, there may be unexpected fluctuations within sectors year on year, and/or differences between the data quality scores between sectors. Any such changes in the availability and quality of data over time, or our ability to collect and process such data, could result in revisions to reported data going forward, including on financed emissions, meaning that such data may not be reconcilable or comparable year-on year;
- Developing methodologies and scenarios: the methodologies and scenarios HSBC uses to assess financed emissions and set ESGrelated targets may develop over time in line with market practice, regulation and/or developments in science, where applicable. Such developments could result in revisions to reported data, including on financed emissions or the classification of sustainable finance and investments, meaning that data outputs may not be reconcilable or comparable year-on year; and
- Risk management capabilities: global actions, including HSBC's own actions, may not be effective in transitioning to net zero and in managing relevant ESG risks, including in particular climate, nature-related and human rights risks, each of which can impact HSBC both directly and indirectly through our customers, and which may result in potential financial and non-financial impacts to HBSC. In particular:

- we may not be able to achieve our ESG targets, commitments and ambitions (including with respect to the positions set forth in our thermal coal phase-out policy and our energy policy, and our targets to reduce our on-balance sheet financed emissions and, where applicable, facilitated emissions in our portfolio of selected high-emitting sectors), which may result in our failure to achieve some or all of the expected benefits of our strategic priorities; and
- we may not be able to develop sustainable finance and ESG-related products consistent with the evolving expectations of our regulators, and our capacity to measure the environmental and social impacts from our financing activity may diminish (including as a result of data and model limitations and changes in methodologies), which may affect our ability to achieve our ESG targets, commitments and ambitions, including our net zero ambition, our targets to reduce our on-balance sheet financed emissions and, where applicable, facilitated emissions in our portfolio of selected high-emitting sectors and the positions set forth in our thermal coal phase-out policy and energy policy, and increase the risk of greenwashing.

Any forward-looking statements made by or on behalf of HSBC speak only as of the date they are made. HSBC expressly disclaims any obligation to revise or update these ESG forward-looking statements, other than as expressly required by applicable law.

Written and/or oral ESG-related forward-looking statements may also be made in our periodic reports to the US Securities and Exchange Commission, summary financial statements to shareholders, proxy statements, offering circulars and prospectuses, press releases and other written materials, and in oral statements made by HSBC's Directors, officers or employees to third parties, including financial analysts.

Our data dictionaries and methodologies for preparing the above ESGrelated metrics and third-party limited assurance reports can be found on: www.hsbc.com/who-we-are/esg-and-responsible-business/esgreporting-centre.

Certain defined terms

Unless the context requires otherwise, 'HSBC Holdings' means HSBC Holdings plc and 'HSBC', the 'Group', 'we', 'us' and 'our' refer to HSBC Holdings together with its subsidiaries. Within this document the Hong Kong Special Administrative Region of the People's Republic of China is referred to as 'Hong Kong'.

When used in the terms 'shareholders' equity' and 'total shareholders' equity', 'shareholders' means holders of HSBC Holdings ordinary shares and those preference shares and capital securities issued by HSBC Holdings classified as equity. The abbreviations '\$m', '\$bn' and '\$tn' represent millions, billions (thousands of millions) and trillions of US dollars, respectively.
