

The following text is the English version of a news release issued in Germany by HSBC Trinkaus & Burkhardt AG, an 80.6% indirectly owned subsidiary of HSBC Holdings plc.

22 August 2013

HSBC TRINKAUS & BURKHARDT AG 2013 INTERIM RESULTS

- Net profit of €88.5m, 9.1% higher than for the comparable period in 2012 (first half of 2012: €81.1m¹)
- Net interest income of €1.4m down by €7.8m (first half of 2012: €9.2m)
- Net fee income improved by €28.5m to €19.4m compared to prior year levels (first half of 2012: €190.9m)
- Administrative expenses at €42.7m, 10.0% lower than for the first six months of 2012 (first half of 2012: €269.7m¹)
- Core tier 1 ratio slightly lower at 12.2% (31 December 2012: 12.9%)

Overview

In a continuing difficult market environment, HSBC Trinkaus & Burkhardt AG ('HSBC Trinkaus' or the 'bank') recorded a solid performance in the first six months of 2013. At €88.5m, net profit was 9.1% higher than for the comparable period in 2012 (€81.1m¹). Pre-tax profit increased by €10.8m to €131.9m compared with €121.1m¹ in the first half of 2012. The bank benefited particularly from higher net fee income and lower administrative expenses.

HSBC Trinkaus' capital ratio at 30 June 2013 was slightly lower at 15.6% compared with 16.6% at 31 December 2012. This is a result of increased risk weighted assets in line with the growth of the bank's commercial banking business. The core tier 1 capital ratio at 30 June 2013 of 12.2% was also slightly below the 12.9% recorded at 31 December 2012. The bank, which already meets the higher capital requirements under Basel III, has sufficient capital to facilitate further business expansion. HSBC

Trinkaus is the HSBC Group's principal subsidiary in Germany and is rated 'AA-(Stable)' by Fitch Ratings.

Financial commentary

Net interest income was down by €7.8m to €9.2m (first half of 2012: €1.4m) as interest income from financial assets fell and lower margins were earned on deposits.

Following a net release of loan impairment and other credit risk provisions of €1.3m in the first half of 2012, a net charge of €5.2m was made for the first six months of 2013. This was due to a net increase of individual assessed impairments of €4.0m and an increase in collectively assessed impairments of €1.2m.

Net fee income improved significantly by €8.5m to €19.4m compared to the comparable period in 2012 (first half of 2012: €10.9m). The bank benefited from a growth of €7.1m, to €24.3m, in fee income from securities business (first half of 2012: €17.2m). Furthermore fee income in the lending business was up by €6.9m to €11.6m. This was mainly driven by fees earned from lead arrangements of large syndicated loans through the ongoing focus on the growth strategy for the bank's commercial banking business.

The decrease in trading income of €0.9m to €1.4m (first half of 2012: €12.3m) is primarily due to the non-recurrence of a significant equity trading gain in the prior year and reduced revenues in Treasury, in line with expectations. Additionally, trading income continues to be impacted by ongoing economic uncertainties.

Administrative expenses fell considerably by €7.0m to €42.7m (first half of 2012: €69.7m¹). This was due to the combination of lower variable staff expenses and a reduction in headcount compared with the comparable period in 2012. Cost saving measures launched in 2012 had a positive impact in reducing other administrative expenses during the first six months of 2013. The bank's cost efficiency ratio improved to 63.9% (first half of 2012: 69.2%).

HSBC Trinkaus & Burkhardt Interim Results 2013/3

Income from financial assets of €12.2m was €7.6m higher than in the previous year (first half of 2012: €4.6m) due to gains from the disposal of financial assets. Furthermore, 2012 interim results included an impairment of real estate investments.

HSBC Trinkaus' total assets increased by €2.9bn to €3.0bn compared with 31 December 2012. Customer deposits of €13.9bn (31 December 2012: €11.9bn) remain the bank's main source of funding. The bank's financial position remains characterised by strong liquidity.

Outlook

HSBC Trinkaus' medium-term target is to become one of the leading international banks for upper mid-market enterprises ('MMEs') and multinational corporate clients. The commercial banking business will be significantly expanded in the coming years, with activities focussed on the German market. Consistent with this strategy, the bank decided to withdraw from its businesses in Luxembourg. In July, the bank's two wholly-owned Luxembourg subsidiaries sold their private banking activities and private banking-related fund business to members of the Lichtenstein-based VP Bank Group. The provision on sale of the Luxembourg businesses will impact the banks' income statement in the second half of 2013, and will lead to lower revenue.

The recently launched growth initiative of HSBC Trinkaus includes the key aims of a substantial broadening of the customer base, the implementation of new products, and the development of new business segments, especially in relationships with upper mid-market enterprises ('MMEs') and multinational corporate clients.

¹ Reported results for 2012 have been restated as a result of the implementation of changes to IAS 19 'Employee Benefits' and the decision of the Federal Labour Court (Bundesarbeitsgericht - BAG) on employee's rights under certain remuneration programmes and the consequential accounting treatment.
