

## Jennifer, Global Markets

**Speaker: Jennifer**

**Jennifer:** It was definitely one of the proudest moments in my life, when I got the offer from the HSBC Internship and Graduate Programme. The first reason why I chose HSBC is the culture. It is a very highly diversified company, and I wanted to work in a globally connected and inclusive environment.

I think the most important quality would be being more proactive, have the courage to ask questions, and then to learn more about different areas. To use one sentence to describe the programme, I would say it is a place where you can take up responsibility, even at an early stage, and really make an impact.

Working in Markets is unparalleled to any other workplace. It is very fast-paced, dynamic, where no two days are the same. There will be new challenges and problems every day that are waiting for you to solve. I think if you are a person who like a fast-changing environment, then Global Markets would definitely be a place for you.
