Independent Limited Assurance Report to the Directors of HSBC France S.A.

The Board of Directors of HSBC France S.A. ("HSBC") engaged us to provide limited assurance on the information described below and set out in the HSBC Green Progress Report dated September 2016 for the HSBC France Green Bond (ISIN FR0013064755) as at 30 June 2016 (the "Green Progress Report").

Our conclusion

Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Selected Information as at 30 June 2016 has not been prepared, in all material respects, in accordance with the Reporting Criteria.

This conclusion is to be read in the context of what we say in the remainder of our report.

Selected Information

The scope of our work was limited to assurance over the allocation of bond proceeds as stated within the "Use of Proceeds" section of the Green Progress Report, marked with the symbol (the "Selected Information"). The Reporting Criteria against which it was assessed are described in the section entitled "Reporting criteria for this Green Bond Report" on page 5 of the Green Progress Report.

Our assurance does not extend to information in respect of earlier periods or to any other information included in the Green Progress Report. We have not reviewed and do not provide any assurance over the individual project information reported, including estimates of sustainability benefits.

Professional standards applied and level of assurance

We performed a limited assurance engagement in accordance with International Standard on Assurance Engagements 3000 (Revised) ‘Assurance Engagements other than Audits and Reviews of Historical Financial Information’, issued by the International Auditing and Assurance Standards Board. A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks.

Our Independence and Quality Control

We have complied with the independence and other ethical requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

Our firm applies International Standard on Quality Control 1 and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our work was carried out by an independent and multi-disciplinary team with experience in sustainability reporting and assurance.

Understanding reporting and measurement methodologies

The Selected Information needs to be read and understood together with the Reporting Criteria, which HSBC is solely responsible for selecting and applying. The absence of a significant body of established practice on which to draw to evaluate and measure non-financial information allows for different, but acceptable, measurement techniques and can affect comparability between entities and over time. The Reporting Criteria used for the reporting of the Selected Information are as at 7 October 2016.

Work done

We are required to plan and perform our work in order to consider the risk of material misstatement of the Selected Information. In doing so, we:

• made enquiries of HSBC’s management, including those with responsibility for green bond governance, management and reporting;
• evaluated the design of the key structures, systems, processes and controls for managing, recording and reporting the Selected Information;
• obtained the internal listing of assets allocated into the green bond, and confirmed that this was consistent with the proposed disclosure of the green bond;
• performed limited substantive testing on a sample basis of the Selected Information at corporate head office to check that the identified assets were in line with the HSBC Green Bond Framework and had been appropriately measured, recorded, collated and reported, including:
  o inspecting a sample of loan agreements to confirm that the use of proceeds of the asset was consistent with one of the categories in the HSBC Green Bond Framework; and
  o inspecting records maintained in HSBC’s financial reporting systems to confirm the existence of the asset, and that it was recorded in the green bond listing accurately;
• made enquiries of HSBC’s Corporate Sustainability team, and inspected evidence of the review performed of each of the proposed eligible green projects or businesses;
• vouched the exchange rates used to independent, external sources and confirmed the accuracy of foreign exchange translation calculations;
• inspected minutes of the Green Bond Committee to confirm that the allocated projects had been considered and approved; and
• considered the disclosure and presentation of the Selected Information.

HSBC’s responsibilities

The Directors of HSBC are responsible for:

• designing, implementing and maintaining internal controls over information relevant to the preparation of the Selected Information.

PricewaterhouseCoopers Audit, 63 rue de Villiers, 92208 Neuilly-sur-Seine Cedex
Téléphone: +33 (0)1 56 57 58 59, Fax: +33 (0)1 56 57 58 60, www.pwc.fr

that is free from material misstatement, whether due to fraud or error;
• establishing objective Reporting Criteria for preparing the Selected Information;
• measuring and reporting the Selected Information based on the Reporting Criteria; and
• the content of the Green Progress Report.

Our responsibilities
We are responsible for:
• planning and performing the engagement to obtain limited assurance about whether the Selected Information is free from material misstatement, whether due to fraud or error;
• forming an independent conclusion, based on the procedures we have performed and the evidence we have obtained; and
• reporting our conclusion to the Directors of HSBC.

This report, including our conclusions, has been prepared solely for the Board of Directors of HSBC in accordance with the agreement between us, to assist the Directors in reporting HSBC’s green bond performance and activities. We permit this report to be disclosed in the Green Progress Report as at 30 June 2016, to assist the Directors in responding to their governance responsibilities by obtaining an independent assurance report in connection with the Selected Information. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Board of Directors and HSBC for our work or this report except where terms are expressly agreed between us in writing.

INTRODUCTION

“The technology and techniques needed to support a low-carbon way of life often require significant investment. I am proud that the proceeds of HSBC’s first green bond are helping clients turn their green aspirations into reality, building a more sustainable future.”

Stuart Gulliver, Group Chief Executive, HSBC, September 2016

Since 2003, when HSBC was among the founding signatories of the Equator Principles establishing an environmental risk management framework for banks, the bank has been at the forefront in supporting growth and innovation in the market for sustainable finance. HSBC was also one of the first banks to support the ICMA Green Bond Principles (GBP) in 2014, and has been a member of the ICMA GBP Executive Committee (Excom) since its inception the same year. Additionally HSBC Asset Management has since signed up to the Montreal Carbon Pledge.

The publication of HSBC’s Green Bond Framework and issuance of HSBC’s inaugural Green Bond in November 2015, which is consistent with the GBP, marked another key step in meeting the dual objectives of supporting both investors and issuers in this fast-growing market. CICERO has assigned a Dark Green rating to HSBCs Green Bond Framework, which is the highest possible certification and indicates that the bank is “implementing a 2050 climate solution today.” This report marks our first annual green bond report on this debut Green Bond issuance, further details on this transaction can be found on our Green Bond webpage here: http://www.hsbc.com/investor-relations/fixed-income-securities/green-bond-reports

HSBC has also been at the forefront in communicating the importance of Green Bonds1 and Sustainable Financing2 to clients, investors and other stakeholders. In Q1 2016 the Group launched the quarterly Sustainable Financing Newsletter, providing comment and information on the latest developments in the market. This Green Bond report is being released in conjunction with the second edition of this newsletter which is now available at http://www.gbm.hsbc.com/solutions/sustainable-financing where you can also sign up to receive direct distribution.

GREEN BOND MARKET OVERVIEW

Since the inception of the Green Bond market, HSBC has played an important role in supporting its establishment, and over time helped to enhance depth and diversification for the benefit of issuers and investors alike by bringing new structures to market and opening the door for progressive dialogue.

Initiatives such as its award-winning research on climate change from the HSBC Climate Centre of Excellence and its work with the Climate Bond Initiative (CBI) on the production of the annual State of the Market Report are examples of the contribution HSBC has made to capturing a wider audience and enhancing the broader understanding of this market.

HSBC is an active member of the Green Bond Principles Executive Committee, and contributes to the ongoing development and update of the Green Bond Principles.

HSBC also plays a leadership role in two of the six ICMA GBP Working Groups, acting as global coordinators of the New Markets Working Group and the Index and Database Group and we are active members of the Social Bonds Working Group and External Review & Standards Working Group.

Additionally, as one of the founding writers of the Social Bonds Guidance (SBG), HSBC now takes an active role in the Social Bond Steering Committee, set up to formalise this guidance through ICMA and bring these products to the capital markets. The Social Bond Guidance was officially released at the ICMA GBP AGM on 16th June 2016 in London.

The bank has also supported climate change efforts by pledging to commit US $1 billion to a Green Bond portfolio which will invest in high quality liquid assets3.

## HSBC GREEN BOND FRAMEWORK SUMMARY

### Pillar

<table>
<thead>
<tr>
<th>Use of proceeds</th>
<th>Evaluation</th>
<th>Funds tracking</th>
<th>Reporting</th>
</tr>
</thead>
</table>
| • Renewable energy  
• Energy efficiency  
• Sustainable waste management  
• Sustainable land use | • Agreed criteria for selecting Use of Proceeds and confirming eligibility  
• Relationship Managers propose the Use of Proceeds  
• Group Sustainability review for ESG factors and compliance with Green Bond Framework and form a recommendation  
• Green Bond Committee confirms eligibility. | • Use of Proceeds tracked via register, ultimately will be tracked via internal loan management system. | • The issuing entity will provide a Green Progress Report, annually until full allocation. Thereafter, the issuing entity will provide a Green Progress Report if there have been material updates made to the project allocation.  
• The Green Bond Committee will review and approve each Green Progress Report, which will include:  
  – Aggregate amounts of funds allocated to each of the Eligible Sectors, followed by more detailed description of the types of business and projects financed  
  – The remaining balance of unallocated Green Bond proceeds at the reporting period end  
  – Confirmation that the Use of Proceeds of the Green Bond(s) issued conform to the HSBC Green Bond Framework. |

Assurance obtained a second party opinion from CICERO on the HSBC Green Bond Framework and been certified as ‘Dark Green’.

### SUMMARY

Overall, HSBC’s Green Bond framework and environmental policies provide a progressive framework for climate-friendly investments. The Green Bond framework lists eligible businesses and projects that are mainly supportive of the objective of promoting a transition to low-carbon and climate-resilient growth and is supported by a strong governance structure.

HSBC has engaged PwC as an independent assurance provider to provide assurance that information in this report has been prepared in line with the HSBC Green Bond Framework.

### EXCLUDED USE OF PROCEEDS

As stated in our framework:

- Nuclear Power
- Weapons
- Gambling
- Alcohol

Furthermore no coal and Palm Oil related assets are or will be financed under this Green Bond Framework.
PROJECT EVALUATION AND SELECTION PROCEDURE

The cornerstone of every Green Bond is the verifiable use of its proceeds to support sustainable investment. To facilitate this, issuers need a robust and transparent framework detailing, among other aspects, a strong project evaluation and selection process.

HSBC’s Green Bond Framework is overseen and governed by the Green Bond Committee (GBC). The GBC is chaired by Group Treasury and consists of sustainability specialists and senior directors from across the businesses, including input from the HSBC Climate Change Centre of Excellence where appropriate.

The GBC has responsibility for the ratification of sustainable projects, which are initially proposed by local banking teams and evaluated by Group Sustainability via a highly-disciplined, multi-step process following clear and consistently applied guidelines, as defined below:

- A definition of green finance/lending has been developed and approved for the purposes of identifying, monitoring and reporting green finance activity across the bank
- Once a green project is identified by the local banker, if the finance/lending is considered to fit within the tighter green bond Eligible Sectors' definitions of the Green Bond Framework, the bankers are prompted to complete a form that details the specifics of the client and the associated green finance/lending
- Once identified, green finance/lending is reviewed by Group Sustainability which considers conformity to HSBC’s Green Bond Eligible Sectors. Sustainability risk including physical, transition and liability risk (a view supported by Mark Carney’s Bank of England speech at the end of 2015) is also reviewed to ensure only those deemed acceptable are considered for HSBC Green Bond allocation recommendation
- Finally the project details, together with Group Sustainability recommendation are submitted to the GBC for their ratification of inclusion or exclusion as use of proceeds of the respective HSBC Green Bond.

4 renewable energy; energy efficiency; efficient buildings; sustainable waste management; sustainable land use; clean transportation; sustainable water management; and climate change adaptation
A summary of the selection process for these projects is noted below:

- HSBC finance/lending identified as green by Relationship Manager – noting whether the Use of Proceeds conform to HSBC Green Bond Framework
- Projects within the region of the issuing entity, in this case EMEA, are considered for potential inclusion
- The HSBC Green Bond Register tracks all projects identified by Relationship Managers within the region of the issuing entity and records the review/approval process performed by Group Sustainability and the Green Bond Committee as noted below
- All projects in the HSBC Green Bond Register are reviewed by Group Sustainability and if ‘approved’, they are ‘ratified’ for inclusion in the Green Bond by the Green Bond Committee
- If ratified by the Green Bond Committee, the projects outstanding commitments as per HSBC’s financial reporting systems at 30 June 2016 (elected reporting date) are recorded within the HSBC Green Bond Progress Reported data
- Exchange rates are taken from HSBC internal conversion rates where project investments are made in alternative currencies
- New projects are those which were agreed and signed within six months of the issuance date of the Green Bond. All other projects are considered to be “existing” projects
- There is no direct financial link between the allocated assets and the green bond itself, i.e. this is an unsecured issuance
- The HSBC Green Bond Register forms the basis of the data in the table below:
<table>

The proceeds of this bond have regional allocation within EMEA with projects located in the following geographies: France, UK, Ireland, Greece, Germany, Italy, Spain, Turkey, South Africa and Czech Republic. For further detail on this allocation, please see the information over the page.
HSBC SUSTAINABLE FINANCING UPDATES

HSBC has created various platforms to facilitate enhanced communication of its Sustainable Financing activities in the last 12 months, they are listed below:

- Sustainable Financing Website: http://www.gbm.hsbc.com/solutions/sustainable-financing
- HSBC Green Bonds Website: http://www.hsbc.com/investor-relations/fixed-income-securities/green-bond-reports
- In September 2015, HSBC Asset Management signed the Montreal Carbon Pledge, committing the asset management business to measure and disclose the carbon footprint of its clients' investment portfolios.

2015 – 2016YTD HSBC SUSTAINABLE FINANCING MILESTONES

HSBC is a member of several industry bodies focused on climate change, such as:

- The ICMA Green Bond Principals Executive Committee – HSBC was one of the initial banks to support the Green Bond Principles (GBP), run by ICMA and has been a member of the Executive Committee since its inception in June 2014
- Social Bond Guidance Steering Committee – As a result of HSBC being one of the founding writers of the Social Bond Guidance (released by ICMA GBP in June 2016), we are now on the initial Steering Committee, formed February 2016
- Green Growth Platform Financial Advisory Council – HSBC joined the Green Growth Platform Financial Advisory Council in 2015 brings together ministers from European governments, businesses and the European Parliament to discuss and debate the economic opportunities and challenges involved in the transition to a low carbon, resilient economy
- HSBC is partner to the CBI – Climate Bonds Initiative – HSBC collaborates with the international, investor-focused not-for-profit organisation, working on mobilizing the $100 trillion bond market for climate change solutions. HSBC is also the sole sponsor of the jointly published SBI/HSBC State of the Market report each year to help raise awareness of climate financing
- Institutional members of China’s Green Finance Committee – HSBC joined in June 2015 having representatives from HSBC’s London and China offices. The Green Finance Committee (GFC) includes members of China’s financial community: regulators, banks, asset managers, insurers and thought leaders; the purpose of which is to identify practical steps to achieving economic growth and environmental improvements through reform of China’s financial system
- Accredited member of the Green Climate Fund – HSBC is one of 3 International Commercial Banks to be accredited by the Green Climate Fund, gaining accreditation in March 2016, thus allowing it to arrange GCF funding for projects
- Founding partner of the Catalytic Finance Initiative – HSBC joined the enlarged CFI in 2016, is part of the Secretariat Group and has been responsible for expanding the CFI’s interest beyond Clean Energy financing into other Sustainable Project Financing
- The Equator Principles Association – HSBC was one of the early signatories of the Equator Principles in 2003. Starting in 2004, HSBC published its own internal Sustainability Policies. We consulted with customers, industry experts, shareholders and non-government organisations (NGOs), focusing on sectors which may have a high adverse impact on people or the environment and in which we have a significant number of customers. We keep our policies under constant review, updating them wherever necessary
- The WEF Climate Leaders CEO Group – Stuart Gulliver is a member and signed the Leader’s statement last year calling for ambitious climate targets and committed to delivering solutions in support of the Paris Agreement
- HSBC Climate Change Centre of Excellence, has once again been voted by Extel as Number 1 provider of Climate Change research, for the fourth year in a row, with teams of research specialists based in London and Hong Kong.
CONCLUSION

HSBC is focused on delivering sustainable approaches to support our Client’s financing requirements.

Whether we’re working with ‘pure green’ companies to continue to invest in their sustainable future, or with ‘high carbon’ companies that need support to begin or develop their transition to a lower-carbon business, we’re focused on delivering the most appropriate sustainable financing solutions.

With the near full allocation of HSBC’s inaugural Green bond now complete, we are continuing to support our Client’s sustainable journeys, and also our own.

In support of our ongoing commitment to the robustness and transparency of the Green Bond market, we have appointed PwC as our independent third party assurance provider of our Green Bond Progress Report and their full assurance statement is provided within this report.

Note: Estimates of sustainability benefit or impact included in this report are based on HSBC’s clients “ex-ante” assessment of benefits for the whole project that HSBC has supported the financing of. HSBC has not independently validated these estimates.
