Targets and guidance

Upgraded	FY25 guidance	Mid-teens or better RoTE in 2025, excluding notable items
		Banking NII \$43bn or better (market dependent)
Reiterated	Target	Mid-teens RoTE in 2026 and 2027, excluding notable items
	FY25 guidance	ECL charge ~(40)bps ¹
		Costs Growth of ~3%, on a target basis ²
		Dividends 50% of EPS excluding material notable items and related impacts ³
	Medium term guidance	Wealth Grow fee and other income at a double-digit % CAGR
		CET1 ratio Manage in 14-14.5% target range
		Loan growth Mid-single digit % CAGR over the medium to long term

Our targets and expectations reflect our current outlook for the global macroeconomic environment and market-dependent factors, such as market-implied interest rates (as of mid-October 2025) and rates of foreign exchange, as well as customer behaviour and activity levels. The medium term is defined as 3-5 years from 1 January 2025

Given current levels of uncertainty, we expect demand for lending to remain muted during 2025. However, over the medium to long term we continue to expect mid-single digit percentage growth for year-on-year customer lending balances

Glossary

Banking NII	Banking net interest income is an alternative performance measure, and is defined as Group net interest income after deducting: (1) the internal cost to fund trading and fair value net assets for which associated revenue is reported in 'Net income from financial instruments held for trading or managed on a fair value basis', also referred to as 'trading and fair value income'. These funding costs reflect proxy overnight or term interest rates as applied by internal funds transfer pricing; (2) the funding cost of foreign exchange swaps in Markets Treasury, where an offsetting income or loss is recorded in trading and fair value income. Alternative Performance Measures

This Presentation contains non-IFRS measures used by management internally that constitute alternative performance measures under European Securities and Markets Authority guidance and non-GAAP financial measures defined in and presented in accordance with SEC rules and regulations (“Alternative Performance Measures”). The primary Alternative Performance Measures we use are presented on a “constant currency” basis which is computed by adjusting comparative period reported results for the effects of foreign currency translation differences, which distort period-on-period comparisons.

Reconciliations between Alternative Performance Measures and the most directly comparable measures under IFRS are provided in our 2024 Form 20-F, the 1Q 2025 Earnings Release, the 2025 Interim Report, and the 3Q 2025 Earnings Release when filed with the SEC, each of which is available at www.hsbc.com.

Information in this Presentation was prepared as at 28 October 2025.
