

8 June 2016

## **SALE OF HSBC'S BRAZIL BUSINESS TO BRADESCO RECEIVES COMPETITION AGENCY APPROVAL**

*All necessary regulatory approvals have now been received for HSBC to complete the sale of its Brazil business having received Brazil's Competition Agency approval on 8 June*

### **Update on the Transaction**

On 3 August 2015, HSBC Holdings plc ('HSBC') announced it had entered into an agreement to sell its entire business in Brazil, comprising HSBC Bank Brasil S.A – Banco Multiplo and HSBC Servicos e Participacoes Ltda (collectively 'HSBC Brazil'), to Banco Bradesco S.A ('Bradesco') for an all cash consideration of US\$5.2bn ('the Transaction'). At completion of the Transaction ('Completion'), the purchase price is subject to adjustment to reflect the movement in the net asset value of the business between 31 December 2014 and Completion.

HSBC confirms that, on 8 June 2016, the Transaction was unanimously approved by the Brazilian Administrative Council for Economic Defence (Brazil's Competition Agency) and the official publication of this decision is expected to be on or before 14 June 2016. Bradesco and HSBC plan to complete the Transaction early in July.

### **Progress in executing HSBC's strategy**

The sale of HSBC Brazil represents a significant step in HSBC's stated goal to optimise its global network and reduce complexity. The Transaction is expected to decrease Group risk weighted assets by around US\$37bn and increase the Group's common equity tier 1 ratio by c.65bps.

HSBC plans to maintain a presence in Brazil to serve large corporate clients with respect to their international needs.

### **Accounting treatment**

Based on the net assets of HSBC Brazil including allocated goodwill at 31 March 2016 of US\$4.3bn, the Transaction would generate a gain on sale (net of tax and transaction costs) of c.US\$0.6bn before the recycling of foreign exchange losses previously recognised in other comprehensive income. After the recycling of foreign exchange losses, there would be an accounting loss on sale of c.US\$1.7bn. Neither the allocated goodwill nor the recycling of foreign exchange losses impact the regulatory capital that will be generated from the disposal at Group level.
